Pittsburgh Dental College

DENTAL DEPARTMENT OF THE WESTERN

UNIVERSITY OF PENNSYLVANIA

Session of 1904 and 1905

1003 PENN AVENUE

PITTSBURGH, PENNSYLVANIA

History

The Western University of Pennsylvania is the oldest institution of learning, with one exception (the University of Nashville) in the United States west of the Appalachian Mountain range. It came into being as the Pittsburgh Academy in the year 1786 and was formally incorporated by Act of Legislature in February, 1787. It was re-incorporated as the Western University of Pennsylvania in February, 1819. It has educated in whole or in part more than six thousand of the young men of Western Pennsylvania and adjacent States, and its alumni have filled many of the most distinguished offices in the gift of the Commonwealth and the nations.

The growth of the institution has been rapid in more recent years and the University is to-day the most largely attended institution of learning in its class in the State of Pennsylvania, with the single exception of its sister institution—University of Pennsylvania, located in Philadelphia.

The University has the following departments:

Collegiate and Engineering Department.
Department of Law.
Department of Medicine.
Department of Pharmacy.
Department of Dentistry.

Summary of Students by Departments
Session of 1903-1904

Collegiate	115
Engineering	109
Law	101
Medicine	315
Pharmacy	118
Dentistry	200
Total	958

Board of Trustees

Class	Date of Election.		
1.	1882	REV. J. C. WHITE, D.D.	Pittsburgh
	1890	BENJAMIN THAW	Pittsburgh
	1893	J. C. DUNN, M.D.	Pittsburgh
	1894	DANIEL H. WALLACE	Pittsburgh
	1894	W. LUCIEN SCAIFE	Allegheny
	1895	ANDREW CARNEGIE, LL.D.	New York
	1896	ROBERT PITCAIRN	Pittsburgh
	1898	JOSIAH COPLEY THAW	Pittsburgh
	1903	F. T. F. LOVEJOY	Pittsburgh
	1903	J. C. LANGE M.D.	Pittsburgh
2.	1882	RT. REV. C. WHITEHEAD, D.D	Pittsburgh
	1885	REV. JOHN W. SPROULL, D.D.	Allegheny
	1889	W. J. HOLLAND, LL.D., Ph.D.	Pittsburgh
	1891	JOHN A. BRASHEAR, Sc.D.	Pittsburgh
	1898	ALLAN C. BAKEWELL	New York
	1900	CALVIN WELLS	Allegheny
	1902	GEORGE H. CLAPP	Pittsburgh
	1902	ALEX. DEMPSTER	Pittsburgh
	1903	REV. J. LEONARD LEVY, D.D	Pittsburgh
	1903	H. P. BOPE	Pittsburgh
3.	1891	THOMAS D. CARNAHAN	Pittsburgh
	1891	HON. J. H. REED	Pittsburgh
	1892	CYRUS B. KING, M. D.	Allegheny
	1903	A. W. MELLON	Pittsburgh
	1900	JAMES H. LOCKHART	Pittsburgh
	1901	EMIL A. SCHAEFER	Pittsburgh
	1902	HON. J. D. SHAFER	Pittsburgh
	1903	T. H. B. McKNIGHT	Pittsburgh
	1903	THOMAS PATTERSON	Pittsburgh
	1903	CHARLES F. SCOTT	Pittsburgh

Ex-officio:

REV. S. B. McCORMICK, D.D., LL.D., Chancellor	Allegheny
HON. WILLIAM B. HAYS, Mayor	Pittsburgh
HON. J. G. WYMAN, Mayor	Allegheny

NOTE—Terms expire: Class 1, 1907; Class 2, 1905; Class 3, 1906.

THE PITTSBURGH DENTAL COLLEGE IS AN EXPONENT OF ADVANCED METHODS IN DENTAL EDUCATION. WITH THE ADOPTION OF THE FOUR YEARS' COURSE, SUFFICIENT TIME IS PROVIDED FOR TEACHING IN SECTIONS WHAT COULD ONLY BE TREATED IN LARGE CLASSES UNDER THE THREE YEARS' COURSE.

BEGINNING WITH THE PRESENT TERM THIS COLLEGE HAS INSTITUTED SEPARATE CHAIRS IN ANAESTHESIA AND EXTRACTING, CROWN AND BRIDGE WORK, ORTHODONTIA AND CERAMICS, AND THESE IMPORTANT PRACTICAL BRANCHES WILL BE GIVEN THE THOROUGH CONSIDERATION THEY REQUIRE.

Calendar for 1904-1905

Infirmary opens September 4th.

Winter term begins October 1st, and continues for seven months.

Thanksgiving vacation, November.

Holiday vacation from December 23d at 12 M. to January 3d, 1905, at 9 A. M.

Washington's Birthday recess, February 22d.

Commencement, Friday, May 1st, 1905.

Spring term begins May 2d, 1905.

Faculty of Pittsburg Dental College

REV. S. B. McCORMICK, D.D.,
Chancellor.
H. E. FRIESELL, D.D.S., Dean,
Professor of Operative Technics and Crown and Bridge Work.
O. L. HERTIG, A.M., D.D.S.,
Professor of Operative Dentistry, Dental Pathology and Therapeutics.
J. F. THOMPSON, D.D.S.,
Professor of Prosthetic Dentistry.
JOHN S. ASHBROOK, D.D.S.,
Professor of Regional Anatomy and Comparative Dental Anatomy.
STEWART L. McCURDY, A.M., M.D., Secretary,
Professor of Anatomy, Oral and General Surgery.
CLEMENT R. JONES, M.D.,
Professor of General Pathology, Materia Medica and Therapeutics.
D. WILLARD FLINT, D.D.S.,
Professor of Orthodontia.
H. S. HASLETT, D.D.S.,
Professor of Dental Anatomy, Anaesthetics and Extracting.
W. L. FICKES, D.D.S.,
Professor of Dental Ceramics.
FREDERICK A. RHOADES, M.D.,
Professor of Physiology and Embryology.
ALBERT F. JUDD, Ph.G.,
Professor of Physics, Chemistry and Metallurgy.

Lecturers

JOHN M. FREEMAN,
Lecturer on Dental Jurisprudence.
RUSSELL H. BOGGS, M.D.,
Lecturer on Electricity and Roentgen Rays.
F. C. FRIESELL, D.D.S.,
Lecturer on General and Dental Histology.

Demonstrators and Assistants

D. T. JENKINS, M.D.,
E. C. HAWKINS, D.D.S.,
H. D. HOWARD, D.D.S.,
T. A. HOGAN, D.D.S.,
A. E. BARD, D.D.S.,
W. S. CLARK, D.D.S.,
ROBERT ZUGSMITH, D.D.S.,
M. R. GIBSON, D.D.S.,
A. C. BARCLEY, D.D.S.,
F. H. MAGILL, D.D.S.,
H. B. REAMER, D.D.S.,
JAMES O. DONALDSON, M.D.,

PROF. SAMUEL ANDREWS, Supt. Pittsburgh Public Schools,
Examiner of Students who desire to enter this College.

General Information

The Pittsburgh Dental College is the Dental Department of the Western University of Pennsylvania. Its classes, however, are conducted independently of the other departments.

Senior students who have passed the required grades and have otherwise complied with the rules of the College are recommended by the Faculty of the department to the Board of Trustees of the University for their degree, the same being conferred by the Chancellor.

Diplomas are signed not only by the Faculty of the Dental Department, but also by the Chancellor and President of the Board of Trustees, and to them is attached the seal of the University.

A Candidate for the degree of D.D.S. must attend four full courses of lectures in some reputable dental college, the last one of which must be in this school. He must be 21 years of age, and of good moral character.

Requirements for Admission

Extracts from Code of Rules of the National Association of Dental Faculties:

"The minimum preliminary educational requirement of colleges of this Association shall be a certificate of having passed the second year of a high school, or its equivalent; the preliminary examination to be placed in the hands of any state or county superintendent of public instruction."

"No member of this Association shall give credit for a full course to students admitted later than ten days after the opening of the session, as published in the announcement."

"That students in attendance at colleges of this Association, to obtain credit for a full term, must be and remain in attendance until the close of the session."

Advanced Standing

Graduates of reputable medical colleges are admitted to the second year course, and are excused from lectures and examinations upon general anatomy, chemistry, histology, physiology and pathology, but are required to take the courses in operative and prosthetic dentistry, special pathology, special histology, special materia medica and therapeutics.

Students presenting credentials from reputable schools, medical, scientific or literary, for work done in branches taught in this school, and covering these branches fully or in clearly definite part, will be credited for such work, provided that such credits shall amount to as much as one-half year.

Students who have earned the degree of A.B., or B.S., in courses similar to the Chemical, Biological course of the Johns Hopkins University may enter the Sophomore year.

Course of Study, with Branches Taught

Freshman Year

Anatomy
Two lectures per week.
- Osteology, Arthrology — Ante-Holiday.
- Myology, Angiology — Post-Holiday.

Laboratory. Throughout the year.
Physics and Electricity.
Dental Anatomy, completed
Operative Technics.
Prosthetic Technics.

Sophomore Year

Anatomy
Two lectures per week.
- Brain, Nervous System — Ante-Holiday.
- Viscera, Special Organs — Post-Holiday.

Dissection. Two parts.
Embryology, completed. Ante-Holiday.
Histology, completed. Post-Holiday.
Materia Medica. Throughout the year. Lectures and Laboratory.
Chemistry, Inorganic. Lectures and Laboratory.
Comparative Dental Anatomy.
Operative Dentistry.
Prosthetic Dentistry.

Junior Year

Physiology. Throughout the year. Lectures and Laboratory.
Metallurgy.
Regional Anatomy. Ante-Holiday. Dissection. One part.
Principles of Surgery. Post-Holiday.

Bacteriology.
General Pathology. Lectures and Laboratory.
Dental Histology.
Practical Crown and Bridge Work.
Practical Metal Work.
Dental Ceramics.
Operative Dentistry.
Prosthetic Dentistry.
Physical Diagnosis.
Dental Materia Medica.
Local and General Anæsthetics.
Infirmary Practice.

Senior Year

Dental Pathology.
Dental Therapeutics and General Therapeutics.
Oral Surgery.
Clinical Surgery.
Jurisprudence.
Applied Electricity, including Roentgen Rays.
Operative Clinical Practice.
Continuous Gum Obturators and Artificial Dentures.
Orthodontia.
Prosthetic Dentistry.
Organic Chemistry.

Operative Dentistry

PROF. O. L. HERTIG.

The principles and practice will be taught by the application of systematic procedures to operations in classes, so that a correct judgment may be formed as to their application in particular operations.

The same method of instruction will be applied by clinical instructors, students in classes being divided into sections.

Modern and accepted methods will be exemplified.

The infirmary is open throughout the year, except during the month of August.

Instruments

Each student, before beginning his work, is required to procure the instruments necessary for his use, a list of which

will be furnished. Each Senior student is required to have a dental engine.

All materials used upon patients, including medicines, napkins, rubber dam, etc., furnished by the college.

Dental Pathology, Materia Medica and Therapeutics

Lectures from this chair will comprise instruction in the principles of Dental Pathology, indication and elements of disease, Pathological dentition, Pathological eruptions, Dental Caries and its results, Odontalgia, Periodontitis, Alveolar abscess, Necrosis, Pyorrhœ Alveolaris and all the various diseases of the teeth, and associate parts, with the therapeutic agents and materials used in the treatment and correction of the same.

Operative Technics

PROF. H. E. FRIESELL.

The object of this course is to make the student thoroughly familiar with the organs to be operated upon, together with the principles that underlie all operations upon the teeth, and to provide a systematic course in manual training.

Students will have before them teeth of each denomination, so that right conceptions of form and the relations of the tissues may be studied.

Systematic nomenclature will be impressed upon the mind.

Shaping the definite outlines, markings and the cutting of sections of each tooth will be practiced.

Shaping cavities, from the simple to the more complex, on models and the teeth in forms, using the different filling materials in common use.

Scaling, bleaching, and, as far as possible, all manipulation of the operative procedure.

Every student will be required to perform each operation separately in an acceptable manner.

This course will be under the immediate direction of the Professor of Operative Technics.

Crown and Bridge Work

A complete course in Crown and Bridge Work, both fixed and removable, will be given the Junior and Senior classes.

The subject will be considered didactically and practically. The various methods of preparing roots, all the accepted styles of crowns and bridges, and the most practical systems of bridge work will be taught.

Dental Prosthesis

PROF. J. F. THOMPSON.

The course will cover Prosthetic Technics, followed by the preparation of the mouth for dentures, impressions, methods of constructing various bases, treatment of metals and alloys which may be of value in dentistry, Continuous Gum Work, the study of temperaments in their relation to the teeth and their arrangement, Artificial Velae, method of making and adjusting appliances for fracture of the maxillae. Besides the patients in the clinic, living models are employed for the students to work upon.

Comparative Dental Anatomy

PROF. J. S. ASHBROOK.

In this division of general anatomy, the student will be taught comparative anatomy by the study of Animal Life, beginning with the lowest forms, and leading up to the highest in regular gradation; taking the teeth seriatim from the lowest types, and showing their progressive evolution from simple to complex forms, demonstrated by skulls, models, charts and stereopticon.

This subject is a strong factor in emphasizing the importance of the law of occlusion.

Regional Anatomy

Special instruction will be given in Regional Anatomy on the regions of surgical importance to the dentist as follows: (1) Maxilla and Antrum of Highmore; (2) Mandible and Tempero-Mandibular Articulation; (3) Salivary Glands; (4) Muscles of Expression and their relation to facial art; (5) Osseous deformities of Head and Face; (6) Nerve and blood supply of teeth, etc.

Anatomy

PROF. STEWART L. M'CURDY.

Outline of Course:

Freshman Year, Ante-holiday. Osteology and Syndesmology; Post-holiday, Muscles, Blood Vessels.

Junior Year, Ante-holiday, Nervous System; Post-holiday, Organs of Special Sense and Viscera.

Instruction in this department consists of lectures and

demonstrations of the anatomy of the entire body, special lectures being given upon regions of the face, head and neck.

Surgical and Topographical Anatomy of face receives special attention as the study of the various parts is considered.

Students are required to make a complete dissection during the Sophomore and Junior years.

To facilitate the study of Anatomy, boxes containing a half skeleton are given the student upon a deposit of $5.00, returnable upon return of box and contents as it was received; or, student may keep the box, if he so desire, at no extra cost.

General and Oral Surgery

Outline of Junior Course of Lectures.

1. General Principles, including Repair.
2. Acute Infections and the Results.
3. Surgical Fevers.
4. Erysipelas.
5. Shock.
6. General Diagnosis.
7. Diseases of the Vascular Systems.
8. Asepsis and Antisepsis.
9. Anaesthetics.
10. Principles in Operations, Wounds and Emergencies.

Outline of Senior Course of Lectures.

11. Diseases of the Structures of the Oral Cavity.
12. Diseases of the Antrum and other Cavities.
13. Diseases and Injuries of the Gums and Alveolar Process.
14. Diseases and Injuries to the Tongue.
15. Diseases, Injuries and Neuroses of the Face.
16. Congenital Defects of the Face and Mouth.
17. Diseases of Bone.
18. Tuberculosis.
19. Venereal Diseases.
20. Diseases of the Salivary Glands.
21. Neuralgia.
22. Tumors.
23. Ankylosis.
24. Fractures.
25. Dislocations.
26. General Conditions Producing Oral Manifestations, and Oral Diseases Producing General Symptoms.

27. Plastic Surgery.
28. Prosthesis.

Operations in hospitals and clinical cases at the College will give the student an opportunity to make a practical study of cases.

A course in Physical Diagnosis is given in order that graduates of this school may be able to make an intelligent examination of the heart and lungs preparatory to the administration of an anaesthetic.

General Phys s

PROF. ALBERT F. JUDD.

Properties of matter, theory of constitution of matter, states of matter, physical measurements, metric system of measures, volume, mass and density, specific gravity, force and equilibrium, hydraulics, hydrostatics and pneumatics, motion, velocity and acceleration, composition and resolution of forces, Newton's laws, gravitation, work, energy and power, machines, temperature and thermometry, specific heat, effects of heat, sound, radiant energy, light, electrostatics, electro-kinetics, sources of electric current, properties of electric current, uses of electric currents, dental applications of electricity.

General and Inorganic Chemistry

Lectures, recitations and laboratory practice. The course is begun with a brief review of the history of the subject, the scope of the science, and its relation to the other physical sciences and to dentistry, with a consideration of the notation and nomenclature employed in modern chemistry. When this preliminary work has been accomplished, the important elementary substances are taken up in the order of their natural classification, and separately lectured upon. Contemporaneous with the lectures, every member of the class receives laboratory practice, which includes the preparation (when possible) of each element in the free state, the study of its leading characters and of its characteristic reactions. When the elements have all received consideration in this manner the class is given a brief drill in qualitive analysis, with practice in the identification of inorganic chemical substances in simple mixtures.

Metallurgy

Lectures, recitations and laboratory practice. The work is carried on with lectures and recitations from lessons assigned

from the text-book. After the general principles of the subject have been reviewed, the manufacture and properties of amalgams and alloys receive consideration, followed by a study of the individual metals and their uses and application in dentistry, with laboratory practice in identification of metals, and in the manufacture and assay of alloys and amalgams.

Organic Chemistry and Chemistry of Anaesthetics

Lectures, recitations and laboratory practice. The lectures and recitations will be devoted to a consideration of the general principles of the chemistry of the Carbon Compounds, their classification and uses. In the laboratory the student is expected to prepare a series of the more important members, and to study their principal reactions and means of identification.

Materia Medica

PROF. CLEMENT R. JONES.

During the early portion of the Freshman year special attention will be given to the definition of words and phrases, their derivation and signification with reference to their use in Materia Medica, Therapeutics and Pharmacy. After this, the most important drugs in general use will be taken up and considered separately, with reference to their physiological effects, doses, methods of administration, their toxic effects, antidotes, etc. The same method of teaching is continued through the course.

General Pathology and Therapeutics

A thorough knowledge of General Pathology is necessary before the more advanced branches or special branches can be properly understood. Hence the object of the teaching in this department is to unfold to the student the fundamental principles of the subject, and bring them within his comprehension; also to increase his interest in the study of the subject, to obtain a knowledge of the inception and course of pathological processes, their changes and effects upon the organism as manifested in abnormal conditions.

Orthodontia

PROF. D. WILLARD FLINT.

Normal Occlusion, the etiology and classification of malocclusion, physiology of tooth movement, character of tissues involved, modern methods and appliances for the correction of malposed teeth, and correction as related to the harmony of the

facial lines, facial art, are all included in the instruction in this branch.

The technical course consists of free hand soldering, soldering and adjusting combination appliances, and making of accurate models. The work is illustrated by stereopticon, charts and models and demonstrated by clinical cases.

Dental Anatomy, Anaesthesia and Extracting

PROF. H. S. HASLETT.

This course will consist of the drawing, modeling and carving of the various teeth, and the study of their surfaces, ridges, fossæ, grooves, etc.

ANAESTHESIA will be taught by lectures and demonstrations; will cover the whole field of local and general anaesthetics, the use, complications and dangers of each, and the means of preventing and treating accidents arising from their use.

The principles of Extracting will be taught by lectures and demonstrations in the infirmary. Particular attention will be given to difficult cases, impacted teeth, and the treatment of hemorrhage and such other accidents as may accompany extracting.

Dental Ceramics

PROF. W. L. FICKES.

Instruction in this course will consist of one lecture each week, supplemented by demonstrations, in detail, of practical, operative and prosthetic porcelain work.

The more important subjects are: The history and development of the porcelain art; the composition, characteristics and manipulation of porcelain compounds; the source of heat employed; the use and care of furnaces, and descriptions and demonstrations of all the more important methods of inlay, crown and bridge and continuous gum work.

No extra fee is required. A room devoted exclusively to this work is equipped with furnaces, including gasoline, gas and electric.

Physiology and Embryology

PROF. FREDERICK A. RHOADES.

The subject of Physiology will be given to second and third year students. The teaching in this branch will consist of lectures, quizzes and practical demonstrations.

In the lectures, it shall be the aim of the teaching to continually keep in mind the fact, which is so little appreciated by the student, that the normal condition must be understood before the abnormal can be known. The student will be taught as far as possible to form his conclusions from facts of personal observation, and from those given to him by the demonstrations of the professor.

Each and every structure of the body will be shown, its function and its relation to every other structure. Special attention will be given to the subjects of blood, circulation, digestion and the nervous system, where these are so closely identified with important laws of interest to the Dental student.

The lectures will be supplemented by quizzes, and each student will be required to pass an examination in all subjects which have been taught.

General and Dental Histology

DR. F. C. FRIESELL.

The course in Histology consists of a systematic presentation of the subject of the minute anatomy of the various parts of the body. The subject is presented partly by systematic lectures, and more especially by the practical study by the individual students of actual specimens under the microscope. The methods of preparation of microscopical specimens are presented and practiced in the laboratory.

Lectures on Dental Histology embrace the origin, development, tissues and the functions of the teeth, and the development of the superior and inferior maxillary bones.

These lectures are fully illustrated by the projection microscope.

Electricity—X-Ray

DR. RUSSELL H. BOGGS.

X-Ray and electricity, as applied to dentistry, has been added to the list of branches taught in the college. The students will be taught the uses of radiography and will be given instruction in preparing and developing plates after they are made. The course will cover instruction in Electro-Physics, Electro-Physiology and Electro-Therapeutics and the control of electricity as a motor power.

Dental Jurisprudence

The course of lectures on this branch will cover the subjects of Dental Witnesses, Rights and Liabilities of Dental Practitioners, including the Law of Crimes, Negligence and

Contracts, as applied to the Practice of the Profession, together with a discussion of the History of Dental Legislation in General, and of the Statutes in Force in Pennsylvania Regulating the Practice of Dentistry.

The aim will be to furnish a correct idea of the general principles of the law as applied to the practice of Dentistry, and to present the subject with a view to making it of practical worth. Students will be required to keep concise, but complete notes of the lectures.

Laboratories

Microscopy and Histology—Sophomore Year

Lectures, recitations and laboratory practice. The work in microscopy is preparatory to the subject of histology, and consists of a course of lectures upon the construction and manipulation of the compound microscope, with practice by the student in preparation of temporary and permanent mounts, including the technique of embedding, sectioning and staining, both of hard and soft tissues.

The laboratory is supplied with microscopes and all the apparatus necessary to render the student familiar with the subject of microscopical technology, as well as the normal Histology of the various tissues and organs of the body.

Special opportunities are offered for original investigation and research.

The course of Histology is obligatory upon the students of the second year, and they will undergo an examination at the close of the course.

Students are required to mount at least twenty-five slides.

Pathology and Bacteriology—Junior Year

Students are required to mount at least twenty-five slides of pathological conditions, including tumors, diseases of the liver, kidneys, lungs, etc.

The bacteriological laboratory is equipped with a high-power microscope, containing oil-immersion lens, Abbe condenser an diris-diaphragm. It also contains incubator, dry and moist sterilizers, and every variety of apparatus known to modern bacteriology.

Students are taught rapid staining and mounting of secretions, principles of sterilization, method of isolating bacteria, technique of making plates, study of colonies, staining, mounting and examination of the more common varieties of bacteria, with special reference to bacteria found in the mouth.

Text-Books

Freshman Year

ANATOMY—Gray.
DENTAL ANATOMY—Black.
PHYSIOLOGY—Stewart or Kirk.
MATERIA MEDICA AND THERAPEUTICS—Potter.
DENTAL PROSTHESIS—American Text-Book, Essig, or Richardson.
CHEMISTRY—Beal, Simon.
DICTIONARY—Dorland or Gould.

Sophomore Year

COMPARATIVE DENTAL ANATOMY—Thompson.
DENTAL HISTOLOGY—Broomell.
OPERATIVE DENTISTRY—American Text-Book, Kirk.

Junior Year

REGIONAL ANATOMY—Eckly.
ORAL SURGERY—McCurdy.
BACTERIOLOGY—McFarland.
METALLURGY—Beal, Essig or Hodgens.

Senior Year

DENTAL PATHOLOGY AND THERAPEUTICS—Burchard or Barrett.
DENTAL MEDICINE—Gorgas.
ORTHODONTIA—Angle or Guilford.

Fees

Freshman Year

Matriculation (paid but once)	$ 5 00
Term ticket	100 00

Sophomore Year

Term Ticket	$100 00
Chemistry (including breakage)	2 00
Histology (including material)	2 00

Junior Year

Term ticket	$100 00
Metallurgy	2 00
Pathology and Bacteriology (including material)	2 00

Senior Year

Term ticket	$100 00
Pathological Chemistry (including Urinalysis)	2 00
Graduation and Diploma	30 00

Fee for dissecting, $5.00 per part.

There are no extra fees.

Examinations

Examinations are held on the various branches taught in a given year at the close of that term.

The marking for examination is based on a scale of 100. Students, to pass their class examinations, must attain an average grade of at least 70 and must not fall below 60 in a single study.

Students of the Freshman, Sophomore and Junior classes falling below 60 in any study will be given the privilege of a second examination before the opening of the next winter term. A student may, however, be admitted to the class in advance if he be conditioned upon not more than two branches; but he must, during the term, pass examination in these branches before he can be examined on the studies of the year upon which he has entered.

Graduation

Candidates for the degree of Doctor of Dental Surgery must have attended four full courses of lectures in a regular dental college, or its equivalent (as required by the rules of the National Association of Dental Faculties), the last of which must have been in this institution. They must be twenty-one years of age and of good moral character and must bring before the professors of Prosthetic and Operative Dentistry such evidence of proficiency in practical dentistry as they may require. *Beginning with the session of 1903-1904, students will be required to attend four full courses of lectures.*

Regular Term

The regular winter term begins October 1, 1904, and continues for seven months, or until May 1, 1905.

STUDENTS MUST MATRICULATE BEFORE OCTOBER 10TH TO OBTAIN CREDIT FOR THE TERM, EXCEPT IN CASE OF SICKNESS. PHYSICIAN'S CERTIFICATE, 10 DAYS ALLOWED.

Students who fail to enter their names on the matriculation book or make application for admission before October 10th may enter upon the payment of $50.00, which amount will be deducted from the term ticket fee of the succeeding year. No time credit can be given upon such attendance.

Fall and Spring Terms

The Infirmary is open from September 1st to July 1st of the following year. During this time patients in abundance are furnished the students for practical work. During the Spring and Fall terms, the Sophomore and Junior classes have an opportunity to complete their requirement in practical work. During these courses daily clinics are given by the Professors and Demonstrators.

Notes

Seats and Laboratory privileges are assigned in order of matriculation

Since Distilled Water is furnished for drinking purposes, there need be no fear of contracting fevers or other diseases.

The Faculty will be glad to advise parents, when so desired, of the progress and general conduct of students.

According to the regulations of the College no fees are returnable. Should the student discontinue his studies, any fee or fees paid will hold good for a subsequent course, but they are not transferable.

Fees are payable in two installments; $50.00 at the time of entering, and no student is formally entered until this fee is paid; $50.00 during the month of January. No student is permitted to enter upon final examinations at the close of the term without a ticket of admittance, which is evidence that all fees are paid, and that he has passed all previous examinations. Graduation fee is returnable to those who fail to pass.

A deposit of two dollars is required from each student, to constitute a damage fund, out of which school property damaged by students is repaired, when the particular offender is unknown. At the end of the year the balance is refunded.

Grades and cards are withheld from students who have not complied with the rules of the College.

The students, by resolution, during session of 1903-1904, made a voluntary contribution of five (5) dollars toward athletics, the same to be paid as tuition to the Dean of the Department.

Checks should be made payable to the Pittsburgh Dental College.
